August 31st, 2026

Hereby, I would like to confirm that Ms. Quray Potosi completed a three months internship in my group at the Research Center Chemical Sciences and Sustainability at Ruhr-Universität Bochum from June to August, 2026. The internship was funded by the Cluster of Excellence RESOLV.

The purpose of her visit was a joint collaborative project on the development and application of machine learning potentials for atomistic simulations.

Prof. Dr. Jörg Behler
